React: JSX

React – Hello World

The following exercise contains the following subjects:

◆ basics

Instructions

Learn first online on how to use **string interpolation** in React. Then answer the questions below.

Create some JSX with the following variables:

1.   const data = ["hello", "world"];

the output should be: "Hello World"

notice the spacing!

2.   const number1 = 5;
      const number2 =6;

the output should be: 5 + 6 = 11

3.   const string = "I love React!"

the output should be : The string's length is <display the length of the string>

Submit the file to Hive.
